

English School

Location: Cairo, Egypt

Year: 2018

Status: Design

Program: Public Space (educational)

The project is an international school with a plot area of 20,210 square meters. The school built up area is about 17,394 square meters. The project is conceived to house an international school that offers superior education in a high-end interior environment.

Reception

Public toilets

Cafeteria

Classroom

Minimal interior spaces, with some accent color patches combine with light oak veneer finish to create lively spaces. Black Lines, volumetric cubes, and vibrant yellow and blue color tones define the reception space. Light grey ceramic floor, black, grey, white and color paint is applied on walls. Some wooden linear louvers highlight certain ceiling parts.

The classrooms have plain white painted walls with wooden treated doors. Highlight colors are present in some parts. Furniture is treated in dark grey or wooden finish to let the colors create contrast in the space.
